

REMARKS

The Specification is amended, beginning at page 9 line 21, to describe and define as "rectarcuate" the wiped field previously shown in FIG. 2.

The Specification is amended, beginning at page 12 line 16, to clarify the track requirements for a previously-described rectangular field and a herein-defined rectarcuate field.

The Specification is amended, beginning at page 14 line 4, to clarify the requirements for previously-described track 52.

The Specification is amended, beginning at page 17 line 9, to clarify that the previously-described center of curvature of gear 414 is both a previously-described virtual pivot point 14_v and a virtual pivot axis for gear 414.

The Specification is amended, beginning at page 20 line 1, to clarify that only when the wiper blade assembly 18' is mounted on wiper arm 16' at point 72 will the wiper arm end be drawn in a linear path 52, creating a rectangular wiped field 28'; and that if the mounting point is either inboard or outboard of point 72 on arm 16', a rectarcuate wiped field is created.

No new material is added by any of these Specification amendments.

Claim 5 is amended to removed the "horizontal" limitation for the first track.

New independent Claim 21 and dependent Claims 22 through 31 are added, bringing the total number of claims to 31 and the total number of independent claims to 3. A fee for the 11 new claims is attached.

CLOSING COMMENTS

Having amended the Specification and Claims by amendment preliminary to examination, Applicant respectfully requests early examination of the application and speedy allowance of all claims.

Respectfully submitted,

A handwritten signature in black ink, reading "Robert C. Brown". The signature is written in a cursive style with a long horizontal line extending from the end.
